

Aviv Glaser

Full Stack Developer

2+ years of hands-on experience as a JavaScript developer specializing in making websites accessible for people with disabilities through code. I craft reusable, lightweight JavaScript functions, reducing working time by up to 14%. I have a profound understanding of website structures, HTML elements (including their roles and events), DOM manipulation, observer patterns, and keen debugging skills.

WORK EXPERIENCE

JavaScript Developer EqualWeb

01/2023 - Present

day-to-day

- Implemented precise and relentless WCAG compliance on hundreds of global websites, ensuring accessibility through code and empowering disabled users worldwide.
- Advanced JavaScript Skills: Gained in-depth knowledge of JavaScript including asynchronous programming, higher order functions, event handling, loops, execution order and task queuing mechanism.
- Efficient Debugging: Examined interferences damaging site accessibility, leading to deep investigation of site source code, window object, event listeners and observer patterns using Google Chrome DevTools and other debugging tools.
- High Code Quality and Organization: writing clean, methodical code with clear and consistent naming conventions for functions and variables. Taking into consideration the optimal balance between user experience and security.
- Technical Accessibility Support: Resolved accessibility legal matters with technical solutions. HTML Expertise: Mastered HTML elements for semantic and accessible code.
- Hitting Deadlines: Consistently delivering projects on time while maintaining a strong focus on quality and efficient execution.

EDUCATION

Full-Stack web development Coruse John Bryce High-Tech Academy

2021 - 2022

Tel-Aviv

Certification Studies

- **Full Stack Certificate:** [🔗](#)

B.A - Education & Communication Ben-Gurion University of the Negev

2017 - 2020

Beer-Sheva

TECHNICAL SKILLS

JavaScript

React

Node.JS

Jquery

PROFESSIONAL EXPERIENCE

Full-Stack: Vacations Site

- End-to-end vacations site with unit & Integration tests.
- **Backend:** Implemented a secure authentication system using JWT, enabling user registration, login, and token-based verification for accessing protected server endpoints. Designed and maintained robust APIs for handling vacation data.
- **Frontend:** Developed an interactive UI allowing users to sort vacations by categories, follow favorite destinations, make bookings with payment integration, and manage personal information via "My Account" area.
- Admins can manage vacations (create, update, delete) directly on site with real-time database updates and view top-selling vacations through the "Reports" page.
- **Tech Stack:** [React TS, Redux, Docker, Node.js, Express.js, MySQL]
- **GitHub:** [🔗](#)

Frontend: E-Commerce Site

- Products received via API request & immediately saved to Redux and Local Storage. The user can search, delete, add & create other products to general product-page or his own personal cart.
- **Tech Stack:** [React TS, Redux, Material-UI]
- **Live Demo:** [Google Firebase:](#) [🔗](#)
- **GitHub:** [🔗](#)
